Aluminum construction of Sooner Select trailers features stout, durable triple hollow core sidewalls. The trailer is built with 2" x 4" I-beams on 13" centers, meeting the demands of transporting livestock across the country.

Convertible pen system includes the Grab & Go pen latching system, which makes it easy to adjust the pen size to each animal's needs.

The Sooner Select features a bright LED light strip that alternates every 2 pens on each side, allowing for more consistent lighting throughout the interior of the trailer.

Lower air gaps with hinged cover panels on models with drop down windows allow for more air movement directly on the livestock.
